7. ☐ Examiner's Amendment/Comment
8. ☒ Examiner's Statement of Reasons for Allowance
9. ☐ Other _____

The following is an examiner's statement of reasons for allowance: Applicants claims all recite the language "consisting essentially of" and as such exclude materials or steps materially affecting the novel and basic characteristics of the claimed invention. Hanes however requires a third component "c" (see Abstract of Hanes) to produce a non hazy blend and patentees blends with only those components encompassing applicants components "i" and "ii" are explicitly disclosed by Hanes to be "hazy". Applicants' specification discloses only examples of blends of two macromolecular components having high transmittance and low clarity and discloses that optical properties are the novel and basic characteristics of their invention. Since the third component of Hanes affects optical properties, substantial amounts of Hane's component "c" (such as is suggested by both rejections present in the FINAL Office action of 7-24-06 in order to arrive at low haze/high transmittance value compositions) are excluded by the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
